

Art. 021-0905-000

Air-operated industrial oil pump Mod. 905 flanged Ratio=5:1 double-acting Delivery capacity 50 l/min For wall-fixing or fixed positions. **Polyurethane** seals

These pumps are advised for the transfer of low-high viscosity oil and similar fluids for medium-long distances. The delivery capacity of a pump varies according to particular applications and combinations. The operating pressure may vary between a minimum of 3 bar and a maximum of 8 bar.

The double-acting guarantees the delivery of a continuous and constant flow, suitable for installations on distribution facilities. To optimize the performance and the time-life of the air-operated pumps we advise to use filtered and lubricated air.
